OLP

Rubber outsole

Rubber outsoles provide versatile functions that make them suitable for many areas of application: excellent cut resistance, heat and cold resistance, high flexibility at cold temperatures, resistance against oil, fuel and many chemicals.

SJ Flex

Metalfree puncture resistant material, which is lighter and more flexible than steel. The material is not thermal conductive. Covers 100% of the surface of the last bottom.

Heel energy absorption

Heel energy absorption reduces the impact of jumps or running on the body of the wearer.

Memory foam

The removable memory foam insole provides extra comfort during stepping and can be exchanged with your own orthopedic sole.

Environments:

Dry environment, Muddy environment, Uneven surfaces
